PROFILE

As a recent graduate with a BCA in Computer Applications, I bring a fresh perspective and a solid foundation in software development and data management. During my academic journey, I excelled in projects involving web development and database design, showcasing my ability to solve complex problems and work effectively in teams. I'm eager to leverage my programming skills and passion for technology to contribute to innovative and impactful projects. Ready to dive in and make a meaningful impact from day one!

PROJECT

eWing

eWing Online Shopping Site is an innovative project designed to address contemporary challenges in online retail. The platform provides detailed product information, user accounts, shopping cart management, order tracking, and secure payment integration. It also features efficient inventory management to ensure product availability.

Technologies Used:
- Frontend: HTML, CSS, JavaScript
- Backend: PHP
- Database: MySQL
- Category: RDBMS

The objective is to offer a user-friendly and comprehensive shopping experience, setting a new benchmark in the online retail industry.

COURCES
